How to solve Nonograms

Shade squares to reveal a hidden picture. The numbers beside each row and above each column give the lengths of the runs of shaded squares in that line, in order from left to right or from top to bottom.

For example, 3 1 means a run of three shaded squares, then at least one blank square, then one shaded square. A 0 means the whole line stays blank.

Take one line at a time. Shade the squares that are covered wherever the runs go, and mark squares that must stay blank with a small dot. Every square you settle is a new clue for the line that crosses it.

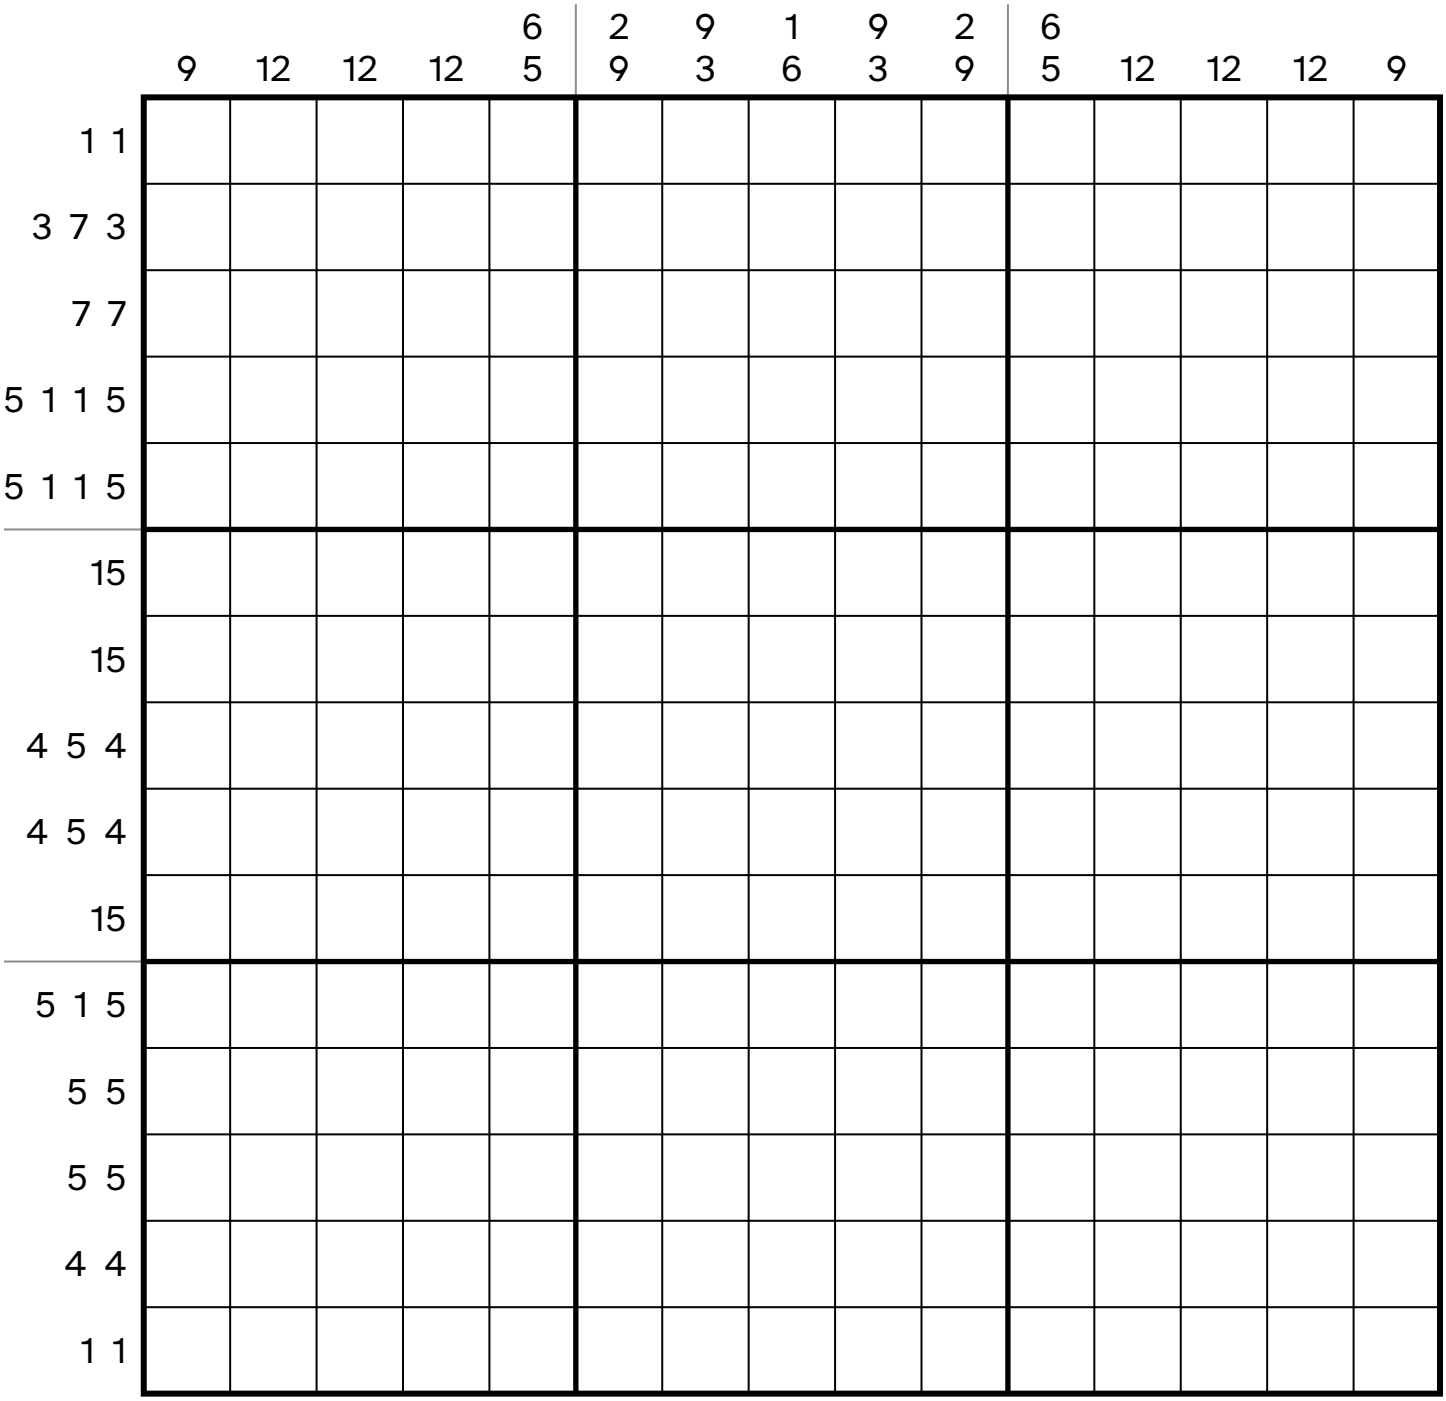

Every puzzle can be solved this way, without guessing. A few start with some squares already shaded in gray, or dotted as blank, to keep it that way. The answer key names each picture.
